

Roof Ventilators

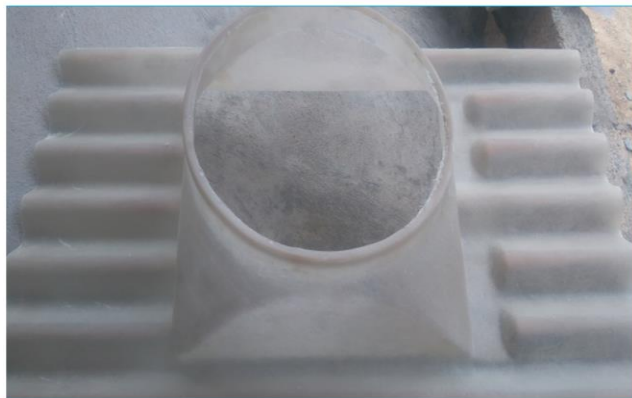

Roof ventilators are the ideal solution for keeping your Industry or home cool in summer. Because they don't require any external power supply to operate they are environmentally friendly and silent – the one thing you will notice is that you have a comfortable and cool place.

Ventilator Base

Polycarbonate Base

FRP Base

Louver:

Angled slats that allow light and air to pass through, block out the rain, direct sun light and outside noise.

Polycarbonate louver with exhaust

Metal Louver
